

Why Choose Us?

- High efficiency
- Long functional life
- Easy installation
- Fire resistant and safe.
- Lower losses.
- Non-hygroscopic.
- (R) Free from partial discharges.
- High dynamic short circuit strength

- Good overload capacity.
- Hign impulse strength.
- Environment friendly.
- (Low cost of installation and maintenance.
- Wide range of power ratings, from few kVA to 15 MVA
- 📤 Single-phase or three-phase
- Typical voltage up to 1000
