

# Home UPS

Reduce the Failure of Electrical  
Power Department Equipments

Model	GD5xx
Capacity	1-5KWp
Application	Domestic
System Type	Grid Tie
System Voltage	500VDC
No. of MPPT	Upto 2
Compatible with	All-Grid Tie Inverter

## Why Choose Us?

-  Reliable, Durable and Economical Power for Grid and Mobile Applications
-  Microprocessor based Inverter/Charger provides Ultra-clean pure sine wave output with less than 5% total harmonic distortion
-  Supply energy to various loads such as resistive load, inductive load, motors and rectifier load.
-  Control panel with large LCD
-  Powerful 300% surge power
-  Low sleep mode power consumption of less than 5W
-  Phase & frequency synchronization option for seamless transfer times
-  Programmable big current, 3 stage battery charger
-  Long backup time up to 10 hours (based on the battery bank and loads).
-  Easy to install, easy to maintain, and built for years of reliable service
